

Example one-way sync from nopCommerce SQL Server to Outlook Contact folder

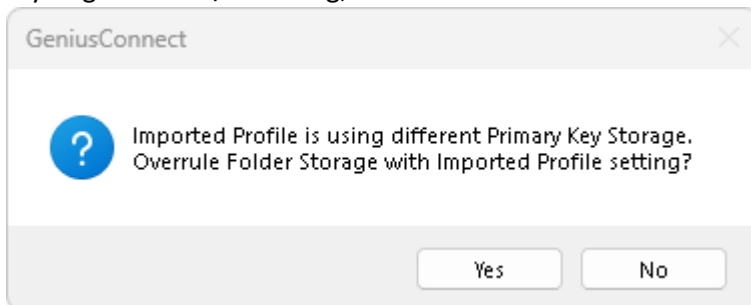

1. Run Example MSSQL Server nopCommerce.sql script in SQL Server management studio to create the view [vwCustomer]
2. Create nopCommerce ODBC Datasource

3. Create a nopCommerce contact Folder in Outlook

4. In GeniusConnect configuration -> Database tab, right click your nopCommerce Contact Folder, select "Import Profile " and import "nopCommerce Example.xml" template.
If you get this Yes/No dialog, Answer "No":

5. Close GeniusConnect configuration with OK Button

6. In Outlook select your nopCommerce Folder and hit GeniusConnect ribbon/toolbar button “Load
